Office Action Summary	Application No. 10/760,347	Applicant(s) OTAKI ET AL.	
	Examiner Anne Marie M. Boehler	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 3611

1. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant claims "first and second back-pressure regulating valves" in claim 14. However, applicant's detailed disclosure refers to only one back-pressure regulating valve 42 (Fig. 4). Therefore, recitation of first and second back-pressure regulating valves appears to be inadvertent.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 8, 9, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakaki (PGPub 2002/0170769).

Sakaki shows a power steering system, in Figure 8, with a torque sensor 26, first and second passages 134, 135, a hydraulic cylinder 27, and torque responsive variable pump 137. Drain passages 140a, 140d, 171a, 170b, are connected to the passages. First and second switching valves 141, 142, are arranged between the passages 134, 135, and the drain passages 140c, 140d. When the pressure from the pump is applied to the switching valves, they open the lines between the pump and the cylinder side

passage . When the pump stops the switching valves open the line between the cylinder side passage at 140 and the drain passage 140c, 140d.

4. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Yokota (PGPub 2003/0178241).

Yokota shows a power steering system with a variable pump 113, cylinder 105, switching valves 124, negative pressure check valves 131, bypass check valves 118, and back pressure regulating valves 130, as claimed.

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

5. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kurata shows a power steering system with a variable pump and switching valves.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne Marie M. Boehler whose telephone number is 571-272-6641. The examiner can normally be reached on 7:30-5:00, Monday-Thursday, and alternate Fridays.
